PROFILE

I am a fresh graduate in Informatics Engineering from Tarumanagara University with a strong interest in software engineering, web development, and digital innovation. I have experience building web and mobile applications using technologies such as PHP, Laravel, JavaScript, Flutter, Firebase, and MySQL, as well as managing databases with MySQL and DBeaver. Beyond technical development, I have been involved in research, education, and technology-based community activities, which have strengthened my communication, collaboration, and problem-solving skills. I am passionate about creating reliable, user-centered digital solutions and continuously expanding my technical expertise to contribute effectively in professional environments.

EDUCATION

Tarumanagara University

Informatics Engineering | 2022 – 2026 | GPA 3.78/4.00

Relevant Courses: Web Programming, Database Management, Front-End Development, and Data Structure.

EXPERIENCE

Part-time Barista | Flash Coffee | *Sep 2025 – Jun 2026*

- Managing daily store operations and providing excellent customer service in a fast-paced environment.

Research Assistant | Tarumanagara University | *Sep 2024 – Nov 2025*

- Performed data acquisition and structuring of academic datasets from various schools (SDS Kasih Immanuel, SDN Kalideres 13) to support the development of an Educational AI Chatbot.
- Led technical workshops for 70+ students (RapidMiner) and 50+ elementary school teachers (Perplexity AI) across various schools in West Jakarta.
- Coordinated project budgeting and financial reporting for AI implementation across Jakarta and Bandung.

Fullstack Developer Intern | DPR RI | *Feb 2025 – Aug 2025*

- Developed web features for DigitAll and E-Wisma systems using Laravel (MVC).
- Managed databases and CRUD modules using MySQL and DBeaver.
- Performed manual testing (QA/QC) for the DPR-RI website and PARSA chatbot.
- Built responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap.

Assistant Lecturer | Tarumanagara University | *Aug 2024 – Dec 2024*

- Facilitated technical learning for 190+ students across multiple courses, including Front-End Development and Operating Systems.
- Instructed students from various study programs on Social Media Analysis using industry-standard tools: RapidMiner and Gephi.

PROJECT

Undergraduate Thesis: Koreksi Ejaan Bahasa Indonesia Dengan Kombinasi SymSpell, Jaro-Winkler, Dan IndoBERT | Feb 2025 – Nov 2025

- Created a system to fix spelling errors using **SymSpell** and **Jaro-Winkler** algorithms for faster detection.
- Used **IndoBERT** to help the system understand the context of sentences for better word suggestions.

Dev Ja Vu Application (Mobile App) | Feb 2024 – Jul 2024

- Built a mobile app using **Flutter** and **Firebase** for user login and storing product data in the cloud.
- Designed the app's look in **Figma** and connected the features for both users and admins.

Memora (Web App) | Feb 2024 – Jul 2024

- Developed a website for notes and activity tracking using **Express.js** and **MongoDB**.
- Added features like a calendar and category folders using **JavaScript**.

Sehat Santai Website | Mar 2024 – May 2024

- Built an information website about diabetes using **HTML, CSS, and JavaScript**.
- Added a simple questionnaire and an automated result page for users.

ADDITIONAL INFORMATION

- **Technical Skills:** HTML/CSS, JavaScript, Dart, Python, PHP (Laravel), C++, SQL (MySQL), Node.js (Express.js).
- **Tools:** Flutter, Firebase, MongoDB, RapidMiner, Gephi, Figma, Visual Studio Code, DBeaver, Microsoft Office.
